Art Unit: 2655

In response to applicant's amendment dated November 09, 2005. The following action is taken:

The reissue oath/declaration filed with this application is defective because the error which is relied upon to support the reissue application is not an error upon which a reissue can be based. See 37 CFR 1.175(a)(1) and MPEP § 1414.

The identified error is the previous declaration is not present in the claims as presently amended.

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

Prior to issuing the case. Applicant must submit a new declaration when filing a new amendment.

Claims 1-39 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

Claims 28-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2655

Claim 28 lacks continuity between the claimed limitations. The claim recites the use of a random-number generating unit...the determination result". However the claim does not recite of what is being done with the random number after being generated. The same rejection applies for claim 34. In addition, claim 34 only recite the use of a first security block for authentication, however the second security block is recorded on the medium, is it for authentication?

Claims 28-39 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Pannu v. Storz Instruments Inc.*, 258 F.3d 1366, 59 USPQ2d 1597 (Fed. Cir. 2001); *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

The following limitations are not present in the reissue application and thus broader aspect related to the subject matter that applicant previously surrendered.

“Wherein said first security block sends first authentication data to be said second security block which is generates second authentication data and adds this second authentication data to the first authentication data and sends both authentication data to said recording means to form said judgment”.

Applicant's arguments filed October 12, 2005 have been fully considered but they are not persuasive. Applicant did not amend the claims to include all of the limitations that was previously present in the original claims. Such limitation as cited above was part of the indicated allowable subject matter within the claims.
